### **Project: TaskFlow – MERN Stack Task Management Application**

**Tech Stack:** HTML, CSS, JavaScript, React.js, Node.js, Express.js, MongoDB, JWT

#### **Description:**

Developed a full-stack task management web application that allows users to create, update, delete, and track tasks with secure authentication. Built a responsive UI using React and implemented REST APIs using Express.js and MongoDB.

#### **Key Features:**

- Implemented **user authentication** using JWT & bcrypt
- Created **CRUD APIs** for task management
- Designed a **responsive UI** with React
- Integrated **protected routes** and dashboard
- Stored and managed data using **MongoDB Atlas**
- Implemented global state using React Context API
